About Myself

I'm a software engineer that loves living in the browser's world. Writing the code that interacts directly with the user is my speciality. My passion is Javascript and all the frameworks I love using to build a great user experience.

Expertise

- High level of skill with Javascript
- AngularJS
- Underscore.js
- CSS/LESS and HTML
- jQuery
- Backbone.js
- Ability to debug extremely intermittent issues
- Sublime Text and its many plugins
- Git -- SourceTree/git command-line
- Chrome's developer tools
- Java/C++/C#

Experience

Software Engineer at Emberex (2010 to present)

- Go-to javascript expert on team dedicated to developing new features and maintaining a large legacy code base
- Managed time effectively while on solo projects with minimal supervision
- Ramping up quickly on projects as needed
- Helped start company efforts to start a mobile division; Lead the iOS Coding Dojo teaching 5 other developers the Cocoa SDK and how to use XCode
- Leading efforts on company's new AngularJS initiative
- Tasked with delivering maintainable HTML/CSS that meets design specifications with pixel perfect accuracy
- Completed company's first iOS/Mobile project on time and under budget
- Regular collaboration with UI/UX team members
- Converted large amounts of a legacy code base from SVN to Git

Education

B.S. in Software Engineering Technology, June 2010

Oregon Institute of Technology, Klamath Falls, Oregon, USA
